How to update the sources list:

1. Open the terminal app

2. Type in **sudo nano /etc/apt/sources.list**

3. Erase the outdated sources list

4. Type in or paste the sources list for Jammy Jellyfish(22.04) or Lunar Lobster(23.04)
   - Make sure to put in a hashtag behind each line that starts with **deb-src**
   - Don't put a hashtag behind lines that start with **deb** instead of **deb-src**

5. Save the new sources list by pressing **ctrl+X** before pressing **y** when nano asks if you want to save the changes

6. Type in **sudo apt-get update** to fully load the new sources list into your system

7. Type in **sudo apt upgrade** to upgrade any outdated packages(optional)

8. Type in **sudo apt autoremove** to remove useless packages(optional)
